# GF Piping Systems quality is no coincidence!

GF Piping systems has not only taken a pioneering role in the past for the range of PVC fittings and equipment, but also in the sector of fusible plastics.

GF Piping Systems developed the socket fusion jointing process 30 years ago, and in

later years also the BCF and IR-Plus fusion methods. More than 9 million IR & BCF fusion joints in the past 15 years world-wide has proven GF Piping Systems performance in jointing technology.

Hot Air / Hot Gas Manual Fusion is the standard jointing method for SYGEF-Exhaust, however it can be implemented on other systems as a repair method &/or for the processing of semifinished materials.

## Component selection basis

SYGEF Plus and SYGEF Standard are system products, pipes and fittings are matched to each other, when selecting SYGEF PVDF fusion components to produce a system; the only consideration needs to be the fusion dimension; PN16 or PN10.

Mechanical joints such as flanges & threaded components are available in various industry standards:

- Flange connections to EN ISO 1092 or ANSI B16.5 #150 (JIS available on request)
- Threaded connections to ISO 7/1 & 228/1 (BSP) or NPT (JIS Rc available on request)
- Sanitary clamp connections to all standards worldwide
- Union connections to GF specification

## Design Factors and derived operating pressures

In various standards for PVDF we find design factors (formerly called safety factors) stated, these are for water.

They are lower than the design factors recommended by GF Piping Systems for industrial applications. In order to protect human beings and the environment, those safety factors cannot be applied for industrial applications. We therefore recommend to use safety factors for SYGEF piping systems as published in the following graph, for the calculation of piping system pressures for industrial applications.

For chemical applications, special considerations must be taken in determining appropriate safety factors, please consult GF for further information.

# Size comparison – SS Tube to PVDF Pipe

## DN, d, inch, nominal bore, o.d. – which is which?

Plastic piping in Inch sizes is typically sized on the nominal bore (DN) which is designated in inches. The outside diameter is fixed but is not mentioned.

Metric piping systems are sized on their outside diameter, with occasional mention of the DN size, when referring to valves or flanges.

Existing comparisons of metric sized pipes to Inch sizes pipes are well known, and generally the variation between Inch and Metric sizes (OD & ID) for the same DN is only a few millimetres.

e.g. The closest size to 1" Sch80 is d32 Metric, with both pipes being «DN25»

However, the sizing for SS tubes is often based on the outside diameter, and this does lead to some confusion. The table below demonstrates which PVDF size pipe is the closest match to SS Tubes in Inch & DIN, and to IPS / BS Inch pipe.

SS Tube Inch	SS Tube ISO/DIN	PVDF Pipe	IPS / BS Pipe
3/4"	DN20	d20	1/2"
1"	DN25	d25	3/4"
1 1/2" <sup>A</sup>	DN32	d32	1"
1 1/2"	DN40	d40	1 1/4"
2"	DN50	d50	1 1/2"
2 1/2"	DN65	d63	2"
3"	DN80	d75	2 1/2"
4" <sup>B</sup>	DN100 <sup>B</sup>	d90 d110	3" 4"
5"	DN125	d125 <sup>C</sup> / d140 <sup>C</sup>	5"
6"	DN125	d160	6"
8"	-	d200	-
-	DN200	d200 or d225	8"

A = There is no 1 1/4" SS Tube Size in Inch dimensions; 3A, ASME-BPE or BS

B = 4" & DN100 SS Tube could transitioned to either d110 or d90 PVDF

C = 5" & DN125 Tube is closest to d125 PVDF, 5" IPS/BS is closest to d140 PVDF

8" SS tube is equivalent to d200 PVDF – DN200 SS Tube could be transitioned to either d200 or d225 PVDF

Further examples of this size comparison can be seen in the SYGEF Plus Sanitary Clamp adaptors for transition to SS Tubes. As a «rule of thumb», the DN value of SS tube should be matched to the d value of PVDF pipe, but there are some exceptions depending upon which standard of SS Tube is employed.

→ In short, DN value is often not a clear indication of the required dimension.

# SYGEF PVDF General Information

- Standard and High-Purity Pipes
- Socket Fusion System
- Butt Fusion (IR/BCF) System
- High-Purity Butt Fusion (IR/BCF) System

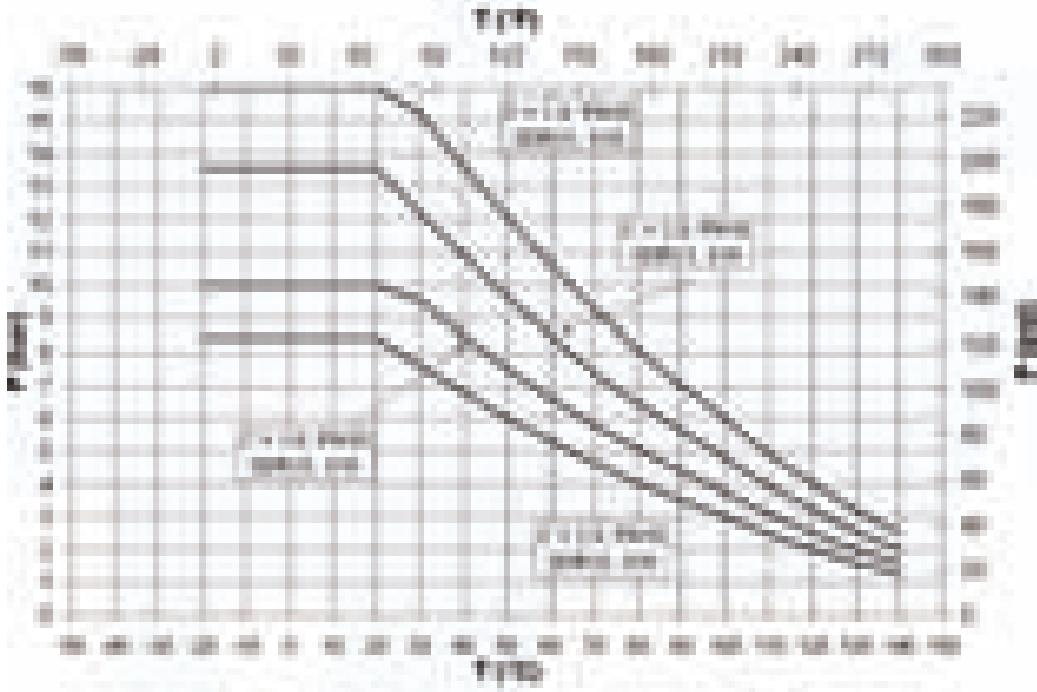

# SYGEF Polyvinylidenefluoride (PVDF) virgin fluoropolymer

PVDF is a thermoplastic fluoropolymer with a melt point of 178°C and a wide service temperature range from -20°C to 140°C. The PVDF polymer chain is very linear and similar to PTFE Teflon except it is not fully fluorinated and contains 3% hydrogen by weight. PVDF materials are ideal for use in aggressive

chemical or ultrapure water systems since they are basically inert, have hard high strength, and are readily weldable into system components. PVDF raw material is commonly available under the trade names Kynar, supplied by Arkema Chemicals, and Solef, supplied by Solvay Fluoropolymers.

## Application limit of SYGEF pipes and fittings

(25-year values with design factor C included in the calculation = 2.0 & 1.6)

## Dedicated Fluoropolymer Production

GF Piping Systems produces SYGEF PVDF piping system components under cleanroom conditions in our state of the art high purity manufacturing facilities in Switzerland and Germany. The entire production process is designed, dedicated and operated to produce high quality PVDF components in both Standard and High-Purity grades. GF IR-Plus™ & BCF Plus fusion technologies are substantial improvements over existing jointing methods such as contact butt fusion and socket fusion.

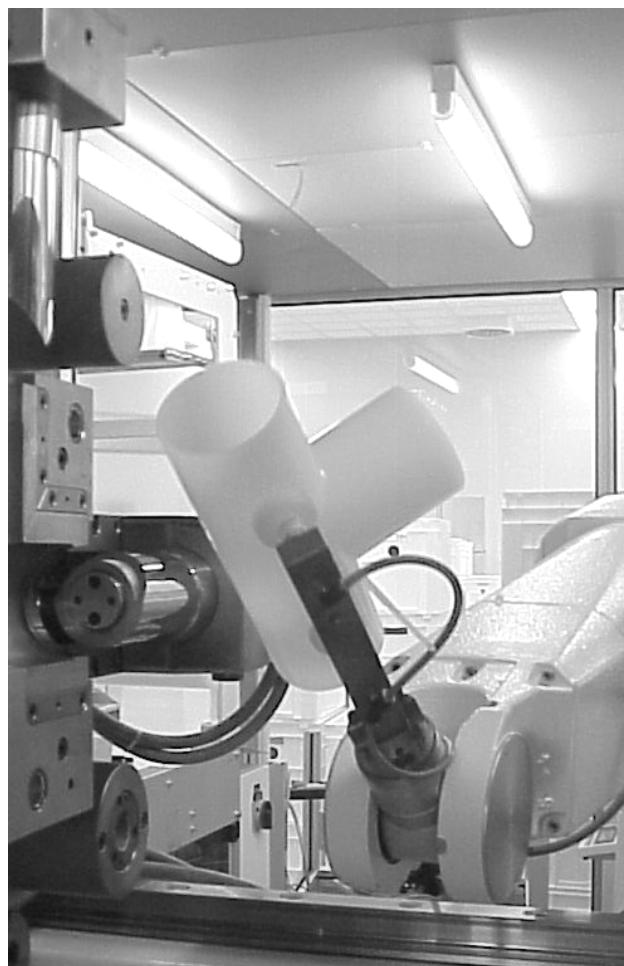

Completing the system are SYGEF PVDF butt fusion fittings and valves specifically designed for use with IR-63 Plus, IR-225 Plus and IR-315 Plus fusion machines, and the BCF-Plus «Bead-&-Crevice-Free» Fusion machine.

For less demanding applications, GF also offers a comprehensive range of Fittings and Valves for Socket Fusion jointing up to the dimension d63.

## SYGEF Standard Wafer check valve type 369 Without spring

### Model:

- Material: PVDF
- Supporting eyelets for simple fitting
- Suitable for vertical and horizontal mounting

### Installation instruction:

- Installation between metric flange adaptors
- Centering by body diameter
- Sealing with special flange gasket (except DN32, o-ring)
- A stabilizing zone of at least 5 times nominal diameter (DN) should be provided before and after the wafer check valve (10 times DN is recommended)
- No direct installation on pump flange or following bend allowed
- Wafer check valves without reset spring are not recommended for pulsating flows (production of noise)

### Note:

In order to install the wafer check valves properly, Georg Fischer recommends flange adaptors of the next larger diameter of the valve (e.g. wafer check valve d90 with two flange adaptors d110)

## SYGEF Standard

### Wafer check valve type 369

### With V4A spring (stainless steel 316)

**Model:**

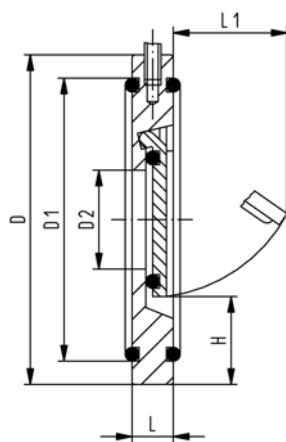

- Material: PVDF
- Supporting eyelets for simple fitting
- Suitable for vertical and horizontal mounting

**Installation instruction:**

- Installation between metric flange adaptors
- Centering by body diameter
- Sealing with special flange gasket (except DN32, o-ring)
- A stabilizing zone of at least 5 times nominal diameter (DN) should be provided before and after the wafer check valve (10 times DN is recommended)
- No direct installation on pump flange or following bend allowed

**Note:**

In order to install the wafer check valves properly, Georg Fischer recommends flange adaptors of the next larger diameter of the valve (e.g. wafer check valve d90 with two flange adaptors d110)

# General information, SYGEF PVDF Piping systems for Silicon-Free or Oil-Free requirements

## Silicon Free & Oil Free

Whilst the typical demand for Silicon Free piping systems has come from Surface Finish (paint & varnish) applications, there is an increasing demand for specially cleaned valves in other fields. Further to this we see a demand for specific Oil Free products in microelectronics & other critical areas.

## High Purity

The SYGEF Plus range of PVDF-HP pipes, fittings and valves effectively fulfils the typical Silicon Free and Oil Free requirements, due to the clean room production, cleaning of fittings & valves, and the double-bag packing under clean room conditions.

## Ball Valves, Check Valves

By their nature, Ball Valves and Check Valves are not a High-Purity design. However for demanding requirements we offer a limited range of specially cleaned & packed Silicon Free or Oil Free Ball Valves and Check valves.

## Diaphragm Valves

For applications requiring Silicon Free or Oil Free, we advise to use SYGEF Plus diaphragm valves only.

## Unions

We advise to use SYGEF Plus unions only. If socket-fusion unions are required, specially cleaned versions are available on request.

## Flange Gaskets

We advise to use SYGEF Plus flange gaskets, Silicon Free cleaned Profile flange gaskets, or commercially available High-Purity ePTFE flange gaskets depending on the application.

## Cleaning process

The individual parts are cleaned with Deionised Water (14-18M) in a specified process. They are assembled in a dedicated clean working area by hand, with Silicon Free gloves.

## Silicon Free Lubricant

Static seals are not lubricated. Seals which are subject to movement will be lightly smeared with a specified Silicon Free lubricant e.g. Synthese PRO AA4.

## Oil-Free Lubricant

Static seals are not lubricated. Seals which are subject to movement will be lightly smeared with a specified Perfluoropolyether, Oil Free lubricant e.g. Krytox GPL 105.

## Packaging & Labelling

All specially cleaned Silicon Free or Oil Free products are single-packed in sealed bags. The products are labelled.

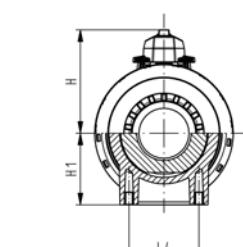

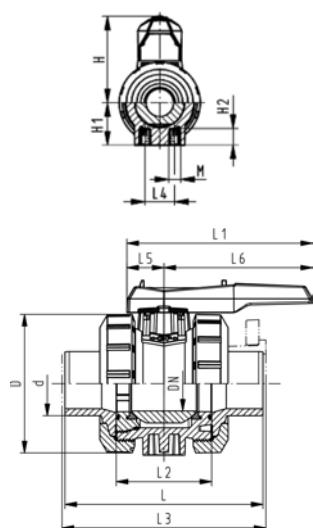

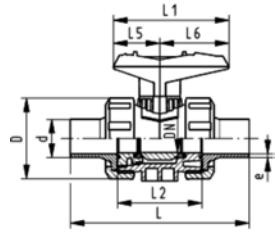

**SILICON FREE**

**OIL FREE**

## Maintenance

For reasons of safety & cleanliness, we recommend changing the entire valve body when maintenance is required, & therefore do not offer Silicon Free or Oil Free spare parts.

- 3.2 The confirmation of order shall govern the scope and execution of the contract.

## 4 Data and Documents

- 4.1 Technical documents such as drawings, descriptions, illustrations and data on dimensions, performance and weight as well as the reference to standards are for information purposes only. They are not warranted characteristics and are subject to change.
- 4.2 All technical documents shall remain the exclusive property of Georg Fischer and may only be used for the agreed purposes or as Georg Fischer may consent.

## 5 Confidentiality, Protection of Personal Data

- 5.1 Each party shall keep in strict confidence all commercial or technical information relating to the business of the other party, of which it has gained knowledge in the course of its dealing with the other party. Such information shall neither be disclosed to third parties nor used for other purposes than those for which the information has been supplied.
- 5.2 In the context of the contractual relation with the Purchaser personal data may be processed. The Purchaser agrees to the disclosure of said data to third parties such as foreign subcontractors and suppliers etc.

## 6 Local Laws and Regulations, Export Controls

- 6.1 The Purchaser shall bring to the attention of Georg Fischer all local laws and regulations at the place of destination which bear connection with the execution of the contract and the adherence to relevant safety regulations and approval procedures.
- 6.2 In case of re-exports, Purchaser shall be responsible for compliance with pertinent export control regulations.

## 7 Price

- 7.1 Unless agreed otherwise, the prices shall be deemed quoted net ex works (according to Incoterms 2010 of the ICC, or latest version) including standard packing. All supplementary costs such as the cost of carriage, insurance, export-, transit- and import- licences etc. shall be borne by the Purchaser. ## 8 Terms of Payment

- 8.1 The Purchaser shall make payment in the manner agreed by the parties without any deductions such as discounts, costs, taxes or dues.

In particular, payment shall still be made when unessential items are still outstanding provided that the Products already delivered are not rendered unusable as a result.

## 9 Retention of Title

- 9.1 The Products shall remain the property of Georg Fischer until the Purchaser shall have settled all claims, present and future, which Georg Fischer may have against him.
- 9.2 Should the Purchaser resell Products to which title is reserved, in the ordinary course of business, he shall hereby be deemed to have tacitly assigned to Georg Fischer the proceeds deriving from their sale together with all collateral rights, securities and reservations of title until all claims held by Georg Fischer shall have been settled. Until revoked by Georg Fischer, this assignment shall not preclude Purchaser's right to collect the assigned receivables.
- 9.3 To the extent the value of the Products to which title is reserved together with collateral securities exceeds Georg Fischer's claims against the Purchaser by more than 20%, Georg Fischer shall re-assign the above proceeds to Purchaser at his request.

## 10 Delivery

Should the effect of force majeure exceed a period of six (6) months, either party may cancel the contract forthwith.  
Georg Fischer shall not be liable for any damage or loss of any kind whatsoever resulting the refrom, any suspension or cancellation being without prejudice to Georg Fischer's right to recover all sums due in respect of consignments delivered and costs incurred to date.
  - c) if the Purchaser is in delay with the fulfilment of his obligations under the contract, in particular, if he does not adhere to the agreed conditions of payment or if he has failed to timely provide the agreed securities.
- 10.3 If for reasons attributable to Georg Fischer the agreed term of delivery or a reasonable extension thereof is exceeded, Georg Fischer shall not be deemed in default until the Purchaser has granted to Georg Fischer in writing a reasonable extension thereof of not less than one (1) month which equally is not met.  
The Purchaser shall then be entitled to the remedies provided at law, it being however understood that, subject to limitations of Art. 16, damage claims shall be limited to max. 10% of the price of the delayed delivery.
- 10.4 Part shipments shall be allowed and Georg Fischer shall be entitled to invoice for such partial deliveries.

In case of carriage-paid delivery transport arrangements shall be made by Georg Fischer. If the Purchaser specifies particular requirements, any extra costs involved shall be borne by him.
- 13.4 In the event of damage or loss of the Products during carriage the Purchaser shall mark the delivery documents accordingly and immediately have the damage ascertained by the carrier. Not readily ascertainable damages sustained during carriage shall be notified to the carrier within six (6) days after receipt of the Products.
